Dear Hiring Manager,

I am writing to express my strong interest in a BI & Analytics Engineer role at your organisation. With over four years of hands-on experience designing and delivering end-to-end data solutions using Power BI and Microsoft Fabric, I have built a track record of turning complex, multi-source data into high-impact dashboards and semantic models that drive real business decisions. I hold three Microsoft certifications — PL-300 (Data Analyst Associate), DP-600 (Fabric Analytics Engineer Associate), and DP-700 (Fabric Data Engineer Associate) — underscoring my commitment to staying at the forefront of the Microsoft data ecosystem.

In my current role as an Associate Software Developer at Embee Software Pvt. Ltd., I have architected end-to-end data ingestion workflows using Microsoft Fabric — designing Lakehouses, Warehouse schemas, and orchestrated Data Pipelines to process large-scale enterprise data reliably. I designed and implemented star-schema dimensional models that significantly improved query performance across Power BI reports, and authored advanced DAX measures covering time intelligence, dynamic ranking, running totals, and KPI calculations. My experience spans the full analytics stack: from data ingestion, SQL views, Power Query data transformation and Dax writing to visual reporting, dynamic Row-Level Security (RLS) configuration and on-premises gateway management in Power BI service.

Beyond the technical work, I have led requirements-gathering sessions with business stakeholders, facilitated UAT cycles, and resolved data discrepancies to deliver high-quality, on-time solutions. I take pride in designing executive-level dashboards that empower self-service analytics and enable data-driven decision-making across business units. I am equally comfortable collaborating with non-technical stakeholders as I am with engineering teams.

I am excited by the opportunity to bring my expertise in Microsoft Fabric, Power BI, DAX and cloud data platforms such as Azure Synapse Analytics to your team. I am confident that my blend of deep technical skills, stakeholder management experience, and passion for delivering actionable insights would make a meaningful contribution to your organisation.

Thank you for considering my application. I would welcome the opportunity to discuss how my background aligns with your needs. Please feel free to reach me at pkoustav6@gmail.com or +91 8240086343 at your convenience.

Sincerely,

**Koustav Paul**
